

**Certificate of Proficiency in Brewing Science (BREWCP)**  
**University of Arkansas, Fayetteville**  
**Internship Request Form**

The Certificate of Proficiency in Brewing Science is designed to provide University of Arkansas, Fayetteville students with a theoretical and practical introduction to brewing and fermentation. The goal of the program is to engage brewing companies from across Arkansas and the region to ensure that graduates are employable and to build internship opportunities for the students.

This Certificate in Brewing Science Program is designed with a core of science, technology, engineering and math courses for 15 credit hours of coursework that includes a required internship, special problems, or honors research project. The coursework involves the interaction between three colleges, the Dale Bumpers College of Agricultural, Food and Life Sciences (AFLS), the J. William Fulbright College of Arts and Sciences, and the College of Engineering. The program is administered by the Food Science Department in the Dale Bumpers College of Agricultural, Food and Life Sciences.
